**HOUE IS A DANISH DESIGN HOUSE FOUNDED IN 2007.
WE COMBINE GREAT COMFORT AND DESIGN IN OUR WORK.
WE ALWAYS PUT A LOT OF EFFORT INTO OUR
PRODUCT DEVELOPMENT STRIVING TO MEET
A HIGH STANDARD.**

CLIPS COLLECTION

**LIGHT ALU FRAMES WITH RUSTIC PLASTIC LAMELLAS AND A MINIMUM OF MAINTENANCE.
DESIGNED BY HENRIK PEDERSEN.**

CLIPS is a collection of outdoor chairs consisting of Dining chairs, Rocking chairs and Bar stools made in wide plastic lamellas which are clipped on a light powder coated aluminum frame.

The components of the large lamellas are carefully composed to give exactly the right strength and resilience. The aluminum combined with the UV protected plastic keeps the maintenance of CLIPS to a minimum.

The plastic lamellas are the visual backbone of the CLIPS range. The vertical joints offer a flexible and comfortable cushion free seat, with an option for you to change the color scheme as you like simply by changing the lamellas.

CLIPS Dining chairs and bar stools come with black aluminum frame with a choice of lamellas in 6 beautiful calm nature colors. Rocking chairs come in black or mono colored frame matching the colors of the lamellas. For dining and rocking chairs you have the choice of adding armrests in beautiful bamboo.

**CLIPS ROCKING CHAIR IN MONO COLOR. AVAILABLE IN 6
BEAUTIFUL COLORS WITH OR WITHOUT BAMBOO ARMRESTS.**

DINING TABLE PERFECTLY.**

**CLIPS DINING CHAIR WITH OR WITHOUT BAMBOO ARMRESTS.
CLIPS DINING CHAIRS ARE STACKABLE.**

BAMBOO IS THE LARGEST MEMBER OF THE GRASS FAMILY.

**THE GROWTH OF BAMBOO IS VERY FAST – THE SPECIES
THAT WE USE FOR FURNITURE GROW MORE THAN 1
METER WITHIN 24 HOURS! BAMBOO RE-PLANTS I SELF.
NEW BAMBOO SHOOTS WILL SPREAD
FROM THE ROOTS.**

Bamboo releases more oxygen than any other plant, actually 35% more than ordinary woods. This is due to the fast growth. Bamboo also recycles large amounts of CO₂. Bamboo can absorb 30% CO₂ and release more than 35% oxygen, so choosing bamboo as material means contributing positively to CO₂ evolution.

In addition to being, a very fast-growing plant, bamboo is a very strong and hard material and stronger than traditional woods. Bamboo is very stable and is affected only very little by humidity.

BAMBOO CARE The bamboo lamellas are treated with a special impregnation from the factory, which is drawn into the bamboo. To keep the bamboo nice, it is necessary to treat the bamboo lamellas on a regularly base with oil suitable for bamboo. We recommend you to, oil the table before taking it into use, and again after approx. 4 weeks, then as needed (3 – 4 times a year)
